Europium is a ductile metal with a hardness similar to that of lead. It crystallizes in a body-centered cubic lattice. Some properties of europium are strongly influenced by its half-filled electron shell. Europium has the second lowest melting point and the lowest density of all lanthanides.

Europium - Wikipedia

Sometimes I get interesting questions that don't quite fit into any of the existing topics already discussed within the blog and my obsessive/compulsive nature tells me that getting these questions in a random

part/page/post of the blog doesn't look quite neat either.
