IMAPS International Conference on High Temperature Electronics (HiTEC) continues the tradition of providing the leading biennial conference dedicated to the advancement and dissemination of knowledge of the high temperature electronics industry. Under the organizational sponsorship of the International Microelectronics And Packaging Society, HiTEC will be the forum for presenting leading high ...

Microfabrication is the process of fabricating miniature structures of micrometre scales and smaller. Historically, the earliest microfabrication processes were used for integrated circuit fabrication, also known as "semiconductor manufacturing" or "semiconductor device fabrication". In the last two decades microelectromechanical systems (MEMS), microsystems (European usage), micromachines ...

Microfabrication - Wikipedia

In electronics, diode modelling refers to the mathematical models used to approximate the actual behaviour of real diodes to enable calculations and circuit analysis. A diode's I-V curve is nonlinear (it is well described by the Shockley diode law). This nonlinearity complicates calculations in circuits involving diodes so simpler models are often required.

Matching properties of deep sub-micron MOS transistors

A comprehensive overview of through-silicon-via technology (TSV) is presented. TSV technology enables Moore's Law to scale vertically. We explore the challenges associated with running high volume TSV manufacturing.
