

clinical biostatistics and epidemiology pdf

The Biostatistics Center is a research center of The George Washington University within the Milken Institute School of Public Health. The Center serves as the coordinating center for large scale multi-center clinical trials and epidemiologic studies.

Welcome to the Biostatistics Center

Epidemiology is the study and analysis of the distribution (who, when, and where) and determinants of health and disease conditions in defined populations.. It is the cornerstone of public health, and shapes policy decisions and evidence-based practice by identifying risk factors for disease and targets for preventive healthcare. Epidemiologists help with study design, collection, and ...

Epidemiology and Preventive Medicine. The Department of Epidemiology and Preventive Medicine uses broad public health expertise and skills in epidemiology, biostatistics and data management to help prevent illness and improve quality of life.

Department of Epidemiology and Preventive Medicine

Preventive healthcare (alternately preventive medicine, preventative healthcare/medicine, or prophylaxis) consists of measures taken for disease prevention, as opposed to disease treatment. Just as health comprises a variety of physical and mental states, so do disease and disability, which are affected by environmental factors, genetic predisposition, disease agents, and lifestyle choices.
