### **Operating systems, Embedded systems and Real-time systems**

An embedded system is a programmed controlling and operating system with a dedicated function within a larger mechanical or electrical system, often with real-time computing constraints. It is embedded as part of a complete device often including hardware and mechanical parts. Embedded systems control many devices in common use today. Ninety-eight percent of all microprocessors are ...

PC/104 is a standard for PC-compatible modules (circuit boards) that can be stacked together to create an embedded computer system. These types of systems are often found in factories, laboratories, and machinery to provide programmable control of a complex system.

### **PC/104 Embedded Systems FAQ, EBX, Linux, Real Time, data**

Operating systems based on the Linux kernel are used in embedded systems such as consumer electronics (i.e. set-top boxes, smart TVs, personal video recorders (PVRs), in-vehicle infotainment (IVI), networking equipment (such as routers, switches, wireless access points (WAPs) or wireless routers), machine control, industrial automation, navigation equipment, spacecraft flight software, and ...

RTOS - FreeRTOS is a high quality free real time embedded operating system from Real Time Engineers, a free RTOS for small embedded systems

### **RTOS - Free professionally developed and robust real time**

An embedded system is a computer that has been built to solve only a few very specific problems and is not easily changed. In contrast, a general-purpose computer can do many different jobs, and can be changed at any time with new programs for new jobs. An embedded system usually does not look like a computer, often there is no keyboard or monitor or mouse.

NuttX is a real-time operating system (RTOS) with an emphasis on standards compliance and small footprint. Scalable from 8-bit to 32-bit microcontroller environments, the primary governing standards in NuttX are

Posix and ANSI standards. Additional standard APIs from Unix and other common RTOS's (such as VxWorks) are adopted for functionality not available under these standards, or for ...
