I took the Ph.D. core econometrics course some years ago using Greene's Econometric Analysis. The book at that time was the first edition. It was an excellent book which had already become a dominant work in the field.

Econometric Analysis: Greene: 9789353061074: Amazon.com: Books

It shows that only in the case of flipping two coins is the probability of observing a head after the first head equal to .5 (well .5 with measurement error).

Econometrics By Simulation: Flip a fair coin 4x

Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.

Introduction Smoking in the mid-20th century was ubiquitous in Australia, as in other Western countries. In 1945, more than three out of every four men and one in every four women were regular smokers. 1 Smoking rates fell dramatically over the following two decades as many men died prematurely and others gave up smoking in response to the concerns about health that were starting to be raised ...

Autocorrelation, also known as serial correlation, is the correlation of a signal with a delayed copy of itself as a function of delay. Informally, it is the similarity between observations as a function of the time lag between them. The analysis of autocorrelation is a mathematical tool for finding repeating patterns, such as the presence of a periodic signal obscured by noise, or identifying ...

Economics (/ ˈ ɛ > k ɛ™ ɛ ^ n ɛ ' m ɛ a k s, i ɛ • k ɛ™ -/) is the social science that studies the production, distribution, and consumption of goods and services.. Economics focuses on the behaviour and interactions of economic agents and how economies work. Microeconomics analyzes basic elements in the economy, including individual agents and markets, their interactions, and the outcomes of interactions.
