Billionaires forgo iron-rich crops in push for GM bananas in India.. Nature has given us a cornucopia of biodiversity rich in nutrients. Malnutrition and nutrient deficiency result from destroying biodiversity. The Green Revolution has spread monocultures of chemical rice and wheat, driving out biodiversity from our farms and diets.

Since the onset of the Industrial Revolution, it has been fairly easy to fall into the mindset of monoculture. The lure of big machines offering us power and control; making our lives easier in some senses, but more complicated in others; has led us into an all-encompassing embrace of the mindset and paradigm that made the modern-day world possible.

### **The Mindset of Monoculture - The Permaculture Research**

Monocultures—whether in agricultural or intellectual practice—are neither tolerant of other systems nor sustainable. For example, since sustainability in the dominant knowledge system implies only supply to the market, it does not preserve ecological stability or biodiversity.
