Economic growth is the increase in the inflation-adjusted market value of the goods and services produced by an economy over time. It is conventionally measured as the percent rate of increase in real gross domestic product, or real GDP.. Growth is usually calculated in real terms - i.e., inflation-adjusted terms " to eliminate the distorting effect of inflation on the price of goods produced.

History. A number of heterodox schools of economic thought challenged the dominance of neoclassical economics after the neoclassical revolution of the 1870s. In addition to socialist critics of capitalism, heterodox schools in this period included advocates of various forms of mercantilism, such as the American School dissenters from neoclassical methodology such as the historical school, and ...
