Mania, also known as manic syndrome, is a state of abnormally elevated arousal, affect, and energy level, or "a state of heightened overall activation with enhanced affective expression together with lability of affect." Although mania is often conceived as a "mirror image" to depression, the heightened mood can be either euphoric or irritable; indeed, as the mania intensifies, irritability ...

History. It has been proposed that there is a particular link between creativity and mental illness (e.g. bipolar disorder, whereas major depressive disorder appears to be significantly more common among playwrights, novelists, biographers, and artists). Association between mental illness and creativity first appeared in literature in the 1970s, but the idea of a link between "madness" and ...
